Midi Roller Blind

decor 365

Midi Roller Blind

The decor 365 midi roller blind is a premium quality shading system with a wide range of control and mounting options enabling the specifier to create the perfect blind for their situation. Choose from two cassette or two fascia options for a streamlined look.

Made in the UK

Our UK manufacturing facility ensures total quality control, short lead times and low transport costs.

Choose your Style

A choice of cassette and fascia profile styles, available in a range of finishes allows you to create the look you want.

Versatile and Flexible

A range of sizes and mounting configurations make decor 365 suitable for all kinds of windows large and small.

Recyclable

The majority of a decor 365 blind can be recycled, conserving energy and resources for future generations.

Environmentally sustainable fabrics

Choose sustainable fabrics from Decor Systems range to pick up environmental credits.

Compatible with Natural Ventilation systems

The optional guide wire system enables the blind to withstand draughts from open windows.

5 Year Warranty

For peace of mind and reduced life cycle costs, decor 365 comes with the Decor Systems standard 5 year warranty.

Child Safe

Specify with confidence, knowing that decor 365 is compliant with the revised BS EN 13120:2009 + A1:2014 standard.

Motorised Operation

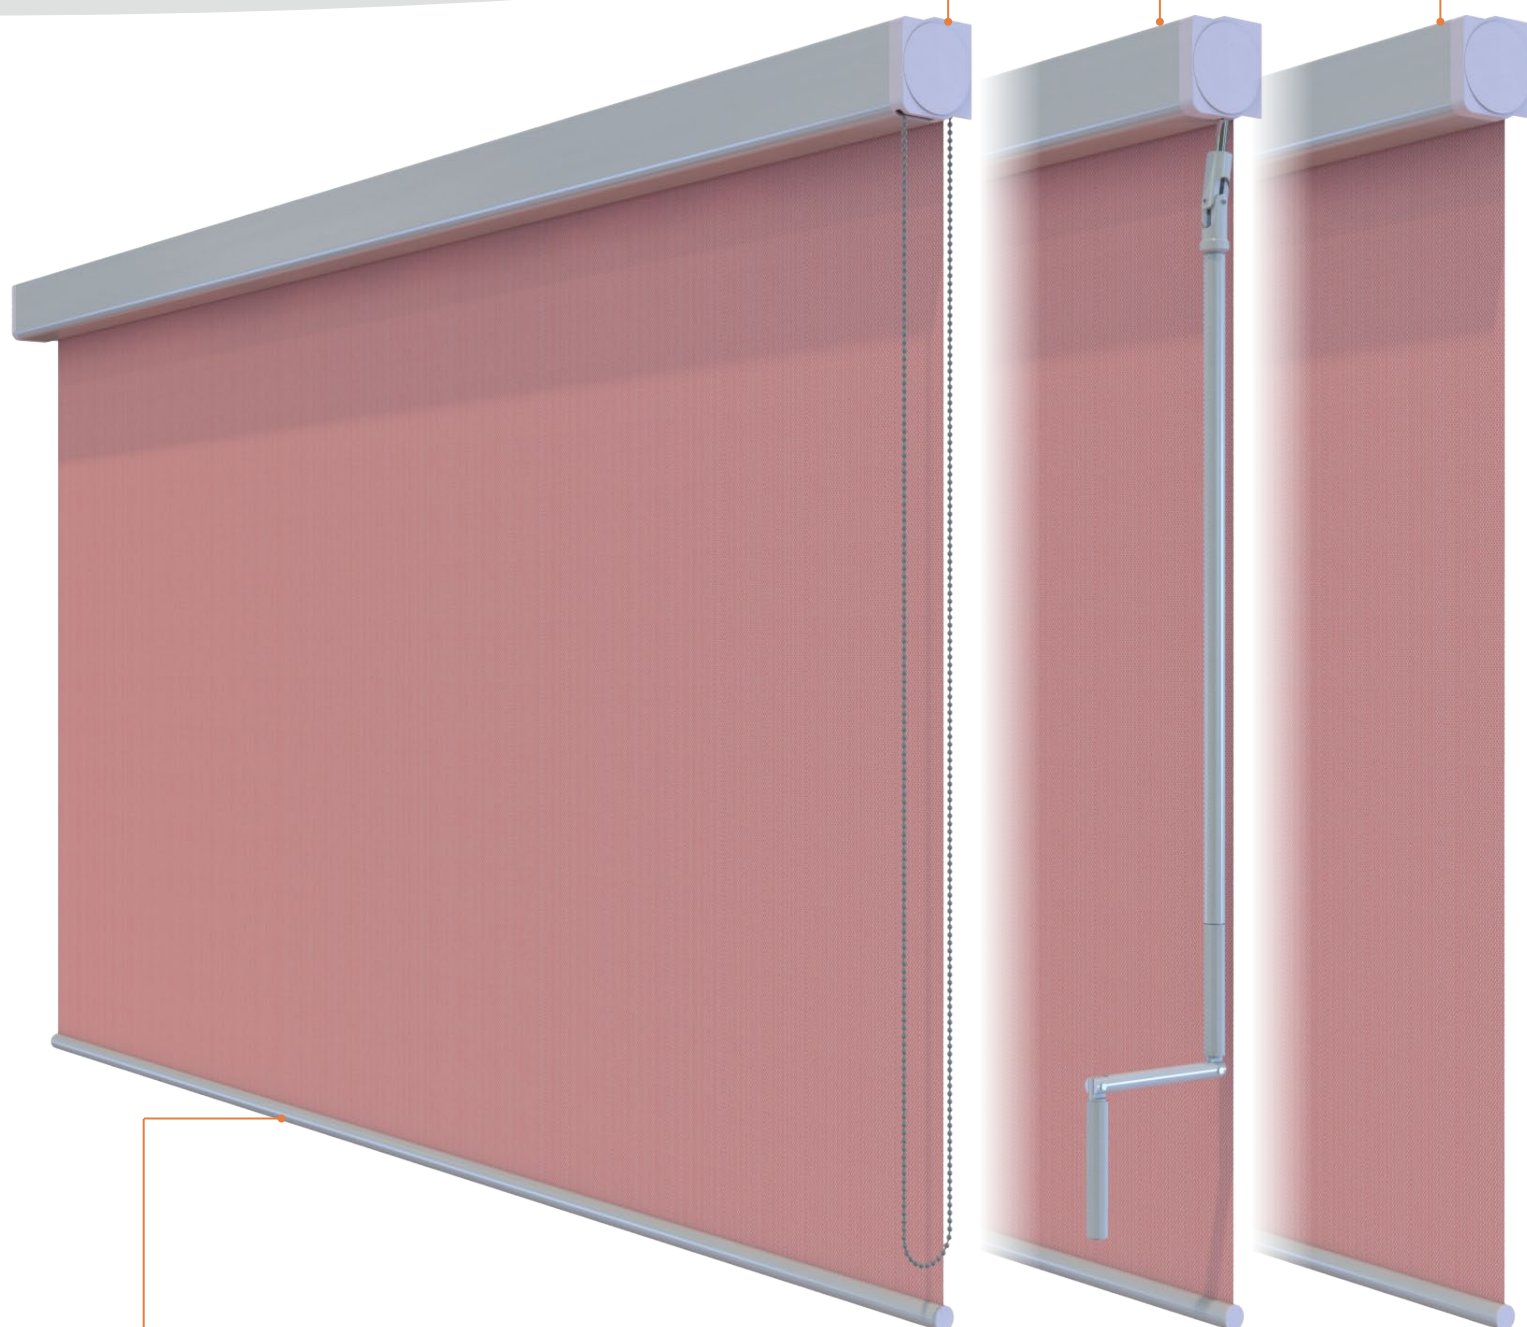

Integrated tubular motor for effortless operation

Revoshaft operation

An inherently child safe option, with fixed or removable operating pole, and a powerful gearbox capable of operating large and multi-linked blinds.

Chain operation

A contract grade clutch mechanism and stainless steel chain for smooth and silent operation in demanding environments

Extruded Aluminium Hem Bar

Rigid profile keeps the fabric flat and lends a pleasing aesthetic touch.

FABRIC TYPES

The fabric is the most important part of a blind. decor 365 roller blinds are available with a wide range of fabrics to suit your requirements. Some fabrics have anti-microbial treatment, solar reflective coating and recycled content – see our website for the full range. Below are the three main fabric types.

Blackout

These fabrics are made from opaque material to give zero light transmittance. Suited to applications requiring maximum light exclusion such as conference rooms, bedrooms or south facing facades

Glare Control

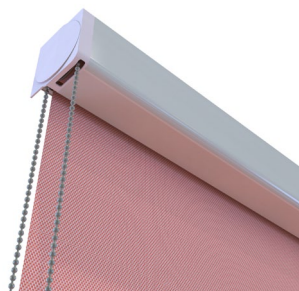

These fabrics are typically close-woven synthetic yarns, which provide total privacy and diffuse the direct sunlight to create a comfortable environment for reading and using computers.

Screen

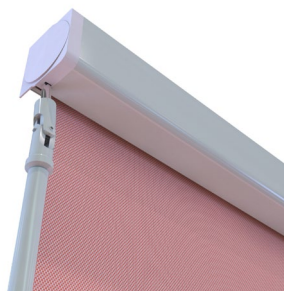

These fabrics all have an element of openness in the weave, making them ideal for large areas of glazing where they help attenuate the light without losing visual contact with the outside world. Ideal for open plan offices, atria and circulation spaces.

OPERATION TYPES

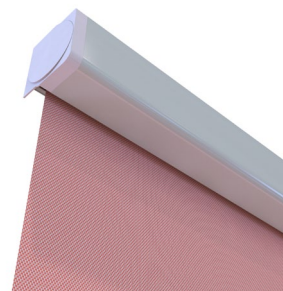

Bead Chain

Stylish metal bead chain for smooth rapid action.

Revoshaft

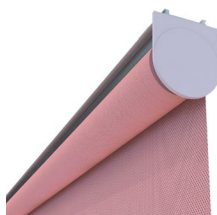

A rugged cord-free option for demanding environments. Available with fixed or removable operating handle.

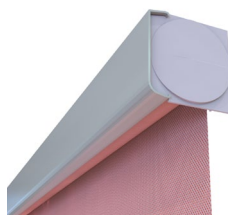

Motorised

Available with a range of quiet, powerful motors concealed within the roller tube. Choose from 24v DC and 240v AC with hardwired, radio or RS485 control systems.

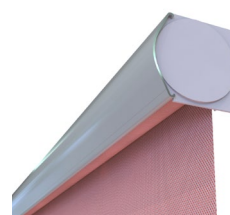

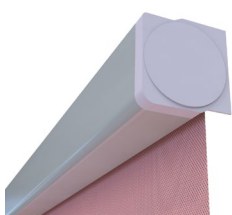

TOP PROFILES

**None****Mounting Profile**

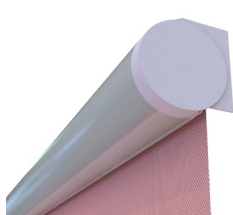

For fixing to plasterboard substrates, to spread the operating load across the full width of the blind.

**Square Fascia**

A fascia neatly conceals the mechanism and brackets and closes the gap between the top of the roller and the window head. Profile is available in square or curved styles.

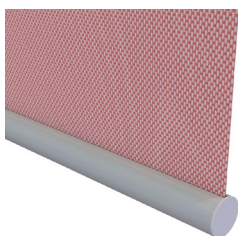

**Curved Fascia****Square Cassette**

A cassette completely encloses the blind for total protection and maximum light exclusion. Spring fixing clamps provide multiple fixing points across the width and allow quick and easy mounting. Profile is available in square or curved styles.

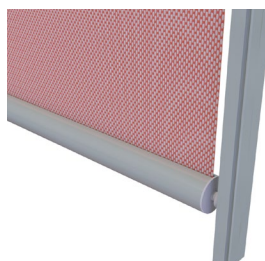

**Curved Cassette****Perimeos™ Ceiling Recess**

Recesses the entire blind into a ceiling for ultimate concealment.

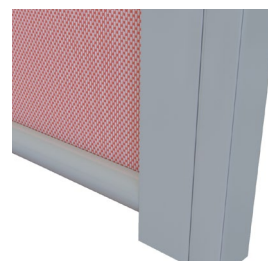

SIDE GUIDES AND CHANNELS

**Without Guides****Wire Guides**

Discreet and cost-effective stainless steel cable guides the hem bar.

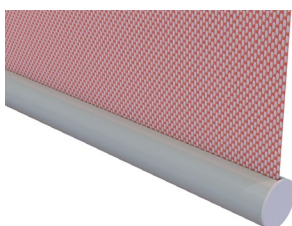

**Track Guides**

Robust aluminium profile guides the hem bar and minimises gap between fabric and window reveal.

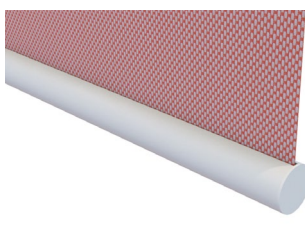

**Side Channels**

For greater light exclusion and total privacy, side channels close the vertical gap between fabric and window reveal.

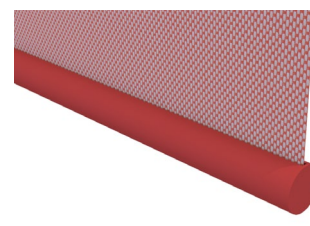

HARDWARE FINISHES

**Silver Anodised**

Cool and contemporary

**White Powdercoated**

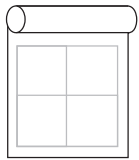

Clean and clinical

**Custom RAL Powdercoated**

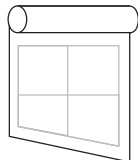

Colourful and Coordinated

Technical

CONFIGURATION

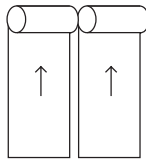

Rectangular

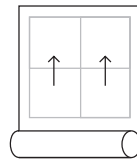

Sloping Cill

The fabric is cut at an angle. Note: the blind cannot be fully retracted

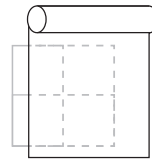

Multiple linked

A single chain operates two or more blinds.

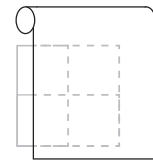

Bottom-up

Blind draws up from the cill. Only available with cord or motorised operation.

Forward Roll

Fabric rolls off the back, closest to the glazing.

Reverse Roll

Fabric rolls off the front, giving extra clearance for window handles
